a. This report is an expert gemological opinion intended to provide an objective assessment of the gemological characteristics of the article at the time of examination based on current gemological methodology and is for informational purposes only. This report is not a guarantee, valuation, or appraisal unless specifically mentioned in the report type as an 'Appraisal Report'

b. IDL uses advanced gemological equipment to analyze and grade articles. Reports describe characteristics based on equipments used and processes deemed appropriate.

c. Grading is done as per 10X magnification and is subjective. IDL uses its expert judgment and industry-standard practices but acknowledges the inherent subjectivity in gem grading and opinions may differ due to lighting, techniques, equipment, and gemologist expertise. Grading of mounted stones for color and clarity in jewelry is limited to viewable areas and may differ significantly from unmounted stones. Stone carat weights in jewelry are calculated from proportions and are estimates.

d. Technology and scientific understanding is constantly evolving. While IDL utilizes advanced techniques to detect treatments and enhancements, some subtle or advanced treatments & enhancements may not be detectable with current technology. IDL detects origin and discloses known treatments, simulants, and synthetics at the time of examination as specified by the report date, these may change at a later date. Treatment details are described on the website.
